

Resources for Learning at Home

Lincoln County Schools has compiled suggested online resources for use in providing students with learning opportunities at home. All of these materials are available free of charge and are NOT mandatory for your students at this time. We encourage you to explore a variety of learning opportunities with your students in addition to the ones we have listed. Reading books, magazines, or other printed material is a great avenue to learning.

Not all of our families have internet or device access at home. Therefore, some internet service providers have extended their availability and are offering free services throughout the pandemic. You may want to check to see if this is available where you live.

If you do not have internet or device access at home and want to pick up a packet of printed materials from your child's school, please complete this form: [Student Learning Packet Request](#). After completing this form, a packet will be available for pick up between 9:00-11:00 a.m. on Mondays and Thursdays, beginning Thursday, March 26th during the duration of the school closure for COVID-19. If your student has an IEP with related services (Occupational Therapy, Physical Therapy, Speech Therapy), resource packets to address these services will be available at the school also. Please email the principal to arrange to pick up these materials.
